

# Takeaways from High Level Segment – Private Sector

- ✓ **Regulatory framework** – creating a supportive/stable framework for private sector investment
- ✓ **Lack of financing**
  - Local FIs not always able to provide capital (e.g. lack of experience in assessing projects/risk)
  - Lack of suitable instruments (e.g. longer dated debt, guarantees/risk sharing, LCY hedging)
- ✓ **Achieving scale** - Aggregation to unlock economies of scale and attract private sector (regionally?)
- ✓ **Addressing adaptation** - Challenge in structuring project that generate a (suitable) financial return
  - Need to think holistically about adaptation (how is private sector impacted/incentivised)
  - Which sectors are most suitable for private sector participation?
- ✓ **Modalities for engagement** PAC private sector is relatively dispersed/informal
  - How to build awareness and foster engagement?
  - Use channels such as chambers of commerce/associations and regional IGOs
